

TRACKS

VMBO / HAVO / VWO / MBO

This is our English course

We are students with different abilities and preferences. But we all want to learn English. With **Tracks**, we can learn online, at our own pace. Our teacher can easily track our progress and set goals. In class we work on great assignments. Tracks really is *our* English course.

One course, three tracks

Students learn in different ways and paces. That's why we created **Tracks**, an adaptive online English course that meets the needs of all types of students in secondary education, MBO and adult education.

Besides being fully adaptive, the course has three separate learning tracks, named after London Underground lines. These tracks can be used to differentiate on both class and student level.

What's in the course?

● CENTRAL

VMBO

Pre-A1 - B2

12 units per level

2 hours per unit

50 words per unit

Short texts

Short videos / vlogs

Short and simple
grammar lessons

Pre-A1 - B2

12 units per level

2 hours per unit

75 words per unit

Extensive reading

Short videos / vlogs

Comprehensive
grammar lessons

● VICTORIA

VWO

Pre-A1 - B2

12 units per level

2 hours per unit

100 words per unit

Extensive academic
reading

Long videos

Comprehensive
grammar lessons

Online practice

The online learning environment enables students to practice at any place and time. Per unit, students learn **50 to 100 new words**, which are then further integrated in listening, reading, writing and speaking exercises. The smart goal system tracks student progress and **automatically sets weekly goals** in order to reach a long term goal preset by the teacher.

Teaching made easy

As a teacher, you can easily track your students' progress in our **completely redesigned teachers' dashboard**. In a few clicks, you can go from a broad overview of your classes' performance to one student's results per exercise.

The smart goals system saves you assigning and reviewing homework, as it sets weekly goals and tracks practice time per week. **Customizable alerts** tell you how your students are doing and who needs attention.

From knowledge to use

We strongly believe in **learning by doing**. Because the students have practiced online, they are ready to speak English in the classroom. The books are full of **interactive lessons** helping students to put their passive knowledge of English to active use.

About Holmwood's

Holmwood's was founded to create the best possible courses for learning English as a foreign language. With our roots in education and IT, we are able to produce courses that not only use state of the art technology, but are soundly based on teaching experience and make extensive use of authentic material.

We help you teach English

Besides offering an excellent product, we also think listening to our customers is highly important. We would be pleased to advise you when choosing an English course and with its implementation. We are available by mail and phone for your questions. We also offer training sessions either in person or via video conferencing.
